

Trending Now: UNIQUE DECORATION

TECH PATCHES

This fashion-forward embellishment technique produces an upscale branding option for our bonded jackets and performance garments. Tech patches flex with the garment and can be designed in a variety of simple shapes. Logos will have a tonal mark on the patch.

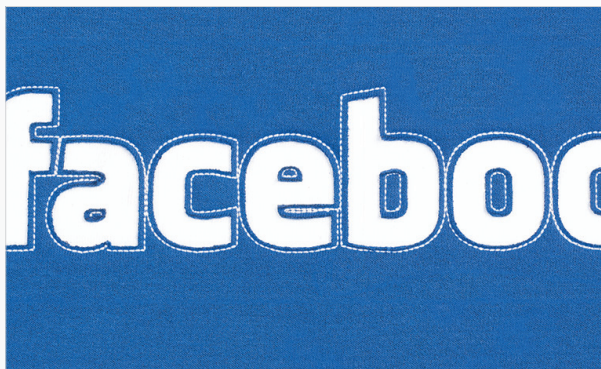

LASER ETCHING

Utilizing laser technology, we can etch on a variety of fabrics. The end result differs by fabric, but is always a precise, clean mark that offers an upscale look. This technique is best for medium-shade garments.

LASER APPLIQUÉ

With high-tech laser cut applique you can choose from a large assortment of fabrics and color to produce everything from classic lettering to fashion designs in single or multiple layers.

REVERSE APPLIQUÉ

The fashion-forward look of reverse applique is created by cutting through the garment surface to reveal a layer of appliqué below.
